Peladow Calcium Chloride

Sold by the bag, pallet and truckload.
50lb bags, 56 bags/pallet

Lowest Temp Ice Melt (-25° F)

Peladow Calcium Chloride is our lowest temperature ice melter which melts down to -25° F. The calcium chloride creates heat when it comes in contact with ice and snow and melts large volumes of ice and snow fast. Won't leave powdery residue.

Spray and Melt the Ice Away with Green Velvet!

Everything you need from Ice Melt to Spreaders!

Ice Go Sprayable Deicer

Sprayable Anti-Icer, De-icer

Ice Go (potassium acetate) is well suited as an anti-icer or as a deicer. The best use of Ice Go is as an anti-icer. Application before precipitation starts will keep snow and ice from bonding to pavement surface, making mechanical removal easier. If anti-icing is not practical, it is also effective as a deicer.

Anti-icing: Apply up to 1 gallon per 1,000 sq ft. Apply prior to precipitation. Removal of snow is required to prevent diluting Ice Go. Should snow accumulate, reapply Ice Go.

Deicing: Suggested application rate is 1 1/2 to 3 gallons per 1,000 sq ft. Rate depends on ambient temperature and amount of frozen precipitation. Conditions closer to 0° F with over 1/2" precipitation will require a higher rate.

Available in 2.5
Gallon Containers

(STS2000)

Earthway S25 Spray Pro

Earthway S25 Spray Pro

Easy to push sprayer with high-speed gearbox pumps solutions through a TeeJet® nozzle for consistent applications.

Three nozzle tips included for varying rates from 74 oz to 120 oz per 1000 sq. ft allowing for a broad variety of uses, from anti-icing solutions during winter to pest and herbicide applications in Spring/Summer. Spray width is 3 to 5 feet depending on walking speed. Lever positions from "transport" to "spray".

While rolling in transport positions, solution bypasses back into the tank, keeping solutions mixed. Includes 6.6 gallon capacity, sturdy, powder coated or stainless steel frame. 5/8 stainless steel axle and 13" pneumatic tires.
