

# Make Your Fall Seedings Count

## with Green Velvet's Premium Quality Grass Seed Blends

Cheap Seed can be the most expensive grass seed you will ever buy! Grass seed is unique, as it is almost impossible to tell the quality by just looking at the seed in the bag. As fall approaches, temperatures are getting cooler, moisture is lasting longer in the soil, and the soil temperatures are warming up, all making grass seed germinate faster than at any other time of the year! Trust Green Velvet's Grass Seed for all of your seeding projects this Fall.

**We know grass because we have been growing grass since 1959!**
